Formatting for Offset Press-Ready Ads

If you are providing a print-ready digital file, your ad must be submitted using the following specifications:

1) Press-ready Adobe Acrobat® PDF file; PDF/X1a
is the preferred file preset. Compatibility should be set for Acrobat 4 (1.3). Please "flatten" all files with fonts embedded before saving. Export from InDesign or Quark Express as 'Press Quality'.

2) Press-ready JPG & EPS files
are accepted. Save Adobe Illustrator files as EPS with embedded photos & art. All fonts converted to outline. Save Adobe Photoshop files as flattened JPG, 300 dpi, in CMYK. 100% black text should be the top layer before flattening so it will overprint any background.

3) Layout:

- Build ads to exact size dimensions, only full page bleed ads require 1/4th inch beyond the trim area on all four sides
- Do not add printer's crop marks to any file
- Use high resolution images, 300 dpi for photos and 1200 dpi for non-vector line art is recommended
- All files must be CMYK. Do not use spot, RGB or LAB colors.
- Do not embed ICC profiles in images
- Avoid scaling images. If necessary, stay within 50%-150% range
- Flatten all transparent objects at a high resolution. Avoid placing transparent object over text or other critical vector objects
- Total ink coverage shouldn't exceed 280%
- Files should be right-reading, portrait mode, 100% to size with no rotations

4) Fonts:

- All fonts must be embedded and/or attached.
- Ensure all black text is 100% black (no rich black).
- Set all black text to OVERPRINT color backgrounds
- Ensure all reverses and colored text are 10 pt or larger, using a thick font.

No computer-printed material or website images will be accepted.

Microsoft Word, Publisher or Canva files will not be accepted for print-ready ads.

Emailed files must be under 15 MB.
